# ABOUT WINTEC

## ABOUT WINTEC

Since its establishment in 1994, WINTEC KOREA has combined technological excellence, innovation, and field expertise accumulated over 20 years of constant research and development to define its position as a coveted global market leader in window furnishing technology.

WINTEC KOREA's advanced cutting edge infrastructure and technological capabilities enables the production of the highest quality fabrics, componentry, finished blinds and even logistics and A/S management. WINTEC's streamlined start to finish capabilities give WINTEC unrivalled competitiveness.

## WINTEC

WINTEC KOREA is committed to constantly creating and developing safe and environmentally friendly products. In 2010 WINTEC KOREA established its own design laboratory where the best field experts use their knowledge and experience towards revolutionary product R&D and take its place at the forefront of ever-changing industry trends.

WINTEC KOREA continues to work dynamically towards its vision of becoming the 'best blinds & shades company' in the world.

## WINTEC HISTORY

## BLINDS + CURTAINS

The Dio Collection showcases a fantastic design coordination of curtains and 3D Shades.

The variety of blackout, sheer, linen and chenille fabrics incorporated with 3D Shade products Waltz, Tango, Delux etc. now offers consumers a more complete design solution.

# ECOLUX<sup>®</sup> 3D SHADES

ECOLUX is the name of WINDOWSTORY's 3D Shade collections. Multi-layered Ecolux fabric is comprised of two layers of sheer woven together with one layer of fabric; this unique structure offers among others excellent sound absorption, energy efficiency, and UV protection properties. Easy operation of a single looped control cord enables up/down movement, light control, exterior view and privacy protection. WINTEC's 3D Shades are available in over 30 designs, and over 50 colors which offer a versatile solution to any interior décor requirements.

## ZEBRA SHADES (Layered Shades)

The Zebra Shades is a dual layer roller blind which consists of alternating horizontal layers of transparent sheer and opaque fabric vanes. Each layers move independently to glide between each other, creating an open/closed effect and allowing light & privacy control and exterior view. Available in SONATINE, VIEWTY and LUNATINE concepts in over 1,000 colors and designs.

## DESIGN SHADES

You are only limited by your imagination. Many of Wintec fabric collection can be digitally printed. Family photos, kids design, brands or your company logo.

## HONEYCOMB BLINDS

With its unique hexagonal cell structure, Honeycomb Blinds offer superior insulation and sound absorption by trapping air, in addition to its simple and aesthetically pleasing design.

## VIEWMAX SYSTEM

Exclusively created by WINTEC KOREA, Viewmax is a Zebra Shades.system which is available in both horizontal and vertical configurations. An upgrade on our regular Zebra Shades systems, the Viewmax ensures that the two layers of fabric are tightly pressed together when the vanes are sliding to open or close, effectively eliminating light gaps in between. The vanes can be opened/closed either horizontally or vertically to provide light & privacy control. Easy & simple operation with its single cord system.

Multi Type

Vertical Type

## SMART ROLL SYSTEM

Exclusively created by WINTEC KOREA, the Smart Roll System features an enlarged headbox which accommodates easy operation of otherwise restrictedly large and heavy fabric blinds. Smart System's Multi-type variation enables the combination of two different fabrics such as sheer & blackout, to function very much like a dual layer curtain.

# PRESTIGE

## PRESTIGE 7, 5, 3

The Prestige Series is the result of WINTEC KOREA's superior engineering. The Prestige is a versatile multi-system which is compatible for manufacturing of ROLLER BLINDS, ZEBRA SHADES and 3D SHADES.

Prestige Series offer silky smooth, effortless operation even for heavy and large blinds. Available in a range of colors to enable coordination with fabric colors.

# MOTORIZED SYSTEMS

## MOTORIZATION SYSTEMS

Motorization offers unrivalled convenience, comfort and above all, peace of mind from child safety concerns with the elimination of operating cords.

### **Energy Saving**

Easy operation of shades to protect against the harsh heat in the summer, and the cold air in winter to save on energy costs

### **Anywhere**

Can be applied to blinds & shades, curtains, external awnings

### **Easy to use**

Motorization makes operating hard-to-reach window blinds a breeze

### **Child Safety**

Motorization offers peace of mind from child safety concerns with the elimination of operating cords.

## **WINTRON® Convenient, wireless solution**

Wintron is a battery operated DC motor capable of operating up to 15kg weight. One remote control can operate up to 7 blinds. With no need for an electrician, the Wintron can be applied to 3D Shades, Zebra, Roller Blinds.

## **Economical motorization solution**

Winclik is our cost effective AC powered motorization system which offers great value in comparison to similar products on the market. Equipped with a safety switch to protect the product against power surge.
